Privacy Policy for MC-Server-Bot

Effective Date: 16-09-2025

1. Introduction

This Privacy Policy outlines how MC-Server-Bot ("the Bot") collects, uses, and protects the information of its users. The Bot is designed to provide real-time status updates and information for a Minecraft Java Edition server. By adding and using the Bot on your Discord server, you agree to the terms of this policy.

2. Information We Collect

The Bot operates with minimal data collection to provide its core functionality. We collect two types of information:

- **Public Information:** The Bot fetches public, non-personal data from the specified Minecraft server, such as its online status, current player count, and game version. This information is publicly available and not linked to any individual.
- **Discord-Related Data:** To function correctly, the Bot may temporarily process certain Discord-related data, including:
  - **Server ID:** To identify the server where a command is being used.
  - **Channel ID:** To post the server status updates in the correct channel.
  - **User ID:** To respond directly to the user who issued a command.
  - **Guild ID**: The unique identifier for your Discord server. This is used to link specific API configurations to your server.
  - **API URL**: A unique API URL provided by the mcstatus service that is specific to your server's configuration. This URL is stored and associated with your Guild ID to ensure the bot can consistently track the correct Minecraft server.

This information is processed only for the duration of the command execution and is not stored long-term.

3. How We Use Your Information
The data collected is used solely for the purpose of providing the Bot's advertised features. Specifically, we use the information to:

- Fulfill command requests, such as `/status`.
- Post automated status updates in designated channels.
- Manage the Bot's presence and functionality on your server.

4. Data Storage and Retention
The Bot stores your Guild ID and the associated, unique API URL in a database. This data is retained to ensure the bot remembers your settings across sessions and restarts. We take

reasonable measures to protect this data from unauthorized access. Your data will be deleted if you request its deletion, as outlined in the "User Rights" section below.

5. Third-Party Services

The Bot uses `mcstatus.io` to fetch Minecraft server information. This is a third-party API that provides public data about Minecraft servers. No personal information is shared with or collected by `mcstatus.io` through the Bot's use of its service.

6. User Rights and Data Deletion

You have the right to request the deletion of your personal data stored by the Bot. If you wish to have your Guild ID and associated API URL removed from our database, you can do so by contacting the developer.

Upon a verified request, we will permanently delete all your data without undue delay. Please note that once your data is deleted, the Bot will no longer be able to function on your server, and you will have to re-add the Bot and its settings to use it again.

7. Changes to This Privacy Policy

We reserve the right to modify this Privacy Policy at any time. Any changes will be posted in the Bot's official support server or GitHub repository. Continued use of the Bot after any changes constitutes your acceptance of the updated policy.

8. Contact Information

If you have any questions or concerns about this Privacy Policy, please contact the developer at: Github.
